IT Internship Opportunities

Abbott Laboratories

Founded more than 100 years ago by Chicago physician Dr. Wallace C. Abbott, Abbott Laboratories has emerged as one of the world's top health care companies. Today, Abbott discovers, develops, manufactures, and markets products and services that span the continuum of care – from prevention and diagnosis, to treatment and cure. Abbott casts a keen focus on areas with the greatest unmet medical need, such as oncology, infectious diseases, diabetes, obesity, immunology and cardiovascular disease. With industry-leading internal research capabilities, Abbott combines science and innovation to develop breakthrough medical technologies that advance patient care through leading pharmaceuticals and medical products, including diagnostics, medical devices and nutritionals. About 40 percent of sales are outside of the United States and more than 55,000 employees in 130 countries around the world support Abbott's vision to be the world's premier health care company, and to bring maximum benefit to patients Abbott is an Equal Opportunity and Affirmative Action employer. Abbott welcomes and encourages diversity in our workforce.
